

**Aspire's Dedicated Leased Lines offer ultrafast speeds which are dedicated to your business, meaning you don't share the bandwidth with anyone else, ensuring that you can always rely on your connection.**

As availability of fibre broadband increases across the UK, businesses need to ensure that they are getting speed, reliability and service at a competitive price.

Whilst many providers appear to offer business grade services, the reality is that these services do not come with reliable upload speeds, crucial when using cloud technologies, industry leading fix times should a fault occur, and consistent performance even at busy times.

All of the above is why any business that is reliant on high performing connectivity invests in leased line technology.

Our dedicated leased lines provide a secure connection for your data to be sent from one location to another without the use of the internet, keeping your company-critical data secure.

Dedicated leased lines are a great option to get you up and running as quickly as possible allowing you to plug your gateway device directly into the carrier equipment once it has been installed. Our technical team can remotely configure your network, getting you connection live on the Aspire core network.

### Why Aspire for connectivity?

**Reliable:** we guarantee 99.9% service uptime, with an industry leading 4 hour fix.

**24/7:** our UK-based 24/7 support ensures that we are always available to deal with any issues that may arise.

**Service:** our services are underpinned by our unbeatable IT Support Solutions, best illustrated by our NPS (Net Promoter Score) score which averages +82, which is deemed 'world-class'.

**Our Partners:** Aspire partners with all the major UK fibre infrastructure providers. This ensures that we can always offer the most competitive pricing as well as the best service available.

### Features and Benefits

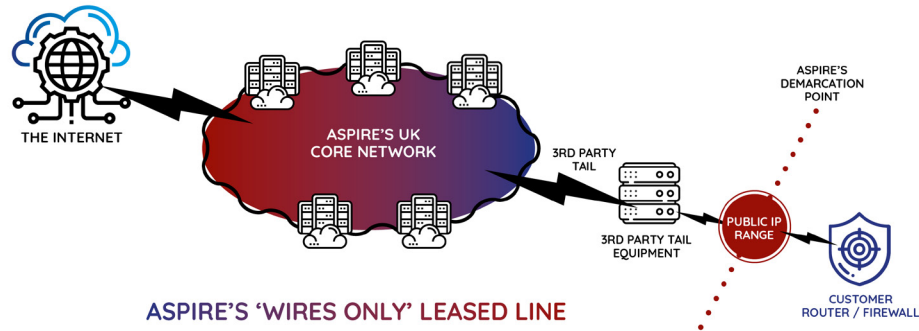

- **Ultrafast:** Aspire offers leased line connections of 10Mbps to 10Gbps, ensuring that you can always upgrade your connectivity to match your business needs.
- **Dedicated:** each leased line connection is dedicated, meaning you don't share your bandwidth with any other company or location.
- **Symmetrical Speeds:** our leased lines offer symmetrical speeds, meaning the upload and download speeds are the same
- **Resilient:** Aspire Leased Lines carry a unique 4 hour guaranteed fix.
- **DDoS Protection:** Aspire Leased Lines offer DDoS Protection as standard.
